-

Projects

Pickly: E-commerce Web Application

A full-featured e-commerce platform built with Next.js 15, TypeScript, and Tailwind CSS.

- Features: real authentication (login/register), product browsing, category & brand filtering, price range filter, search functionality, animated hero section, product details with gallery, wishlist, cart & checkout, order confirmation, and pagination.

-Tech Stack: Next.js (App Router), TypeScript, Tailwind CSS, Framer Motion, React Icons, React Context API, RESTful API integration

Live Demo: <https://pickly-ecommerce.vercel.app> | Repo: <https://github.com/Samarmar2727/pickly-ecommerce>

Movie Web App

A responsive movie database application built with React (Vite), Tailwind CSS, and Material UI.

- Features: dynamic hero section (auto-switching every 5 seconds), search functionality, filter by movies & series, movie details page with YouTube trailer integration, wishlist, pagination, and full movie browsing.

-Integrated with OMDb API for fetching movie data.

Live Demo: <https://movie-web-app-five-sable.vercel.app> Repo: <https://github.com/Samarmar2727/movie-web-app>

To-Do List App

Created with React & Material UI. Features add, edit, delete, and mark tasks as complete. Responsive and clean UI.

Live Demo: <https://to-do-list-by-react.vercel.app>

Repo: <https://github.com/Samarmar2727/TO-DO-List-by-react>

Social Media App (Training Project)

Features login, register, logout, create & delete posts, add & delete comments, pagination for posts, and profile page with avatar upload. API integration with Tarmeez Academy API.

Repo: <https://github.com/Samarmar2727/social-media-project>

Weather App

A weather forecast app built with React and OpenWeather API. Features city search, live temperature display, and responsive design.

Repo: <https://github.com/Samarmar2727/weather-app>

GitHub User Search

A React application that allows both normal and advanced search for GitHub users.

Repo: <https://github.com/Samarmar2727/github-user>

Coffee Delivery App (React Native with Expo)

A mobile app simulating a coffee ordering system with onboarding, order placement, and delivery tracking on a map. Built with React Native & Expo using mock data.

Repo: <https://github.com/Samarmar2727/alx-coffee-shop-app>
